Gordon:

Enclosed is a complete packet of information going back to 2000. I modified the Phase 1 Proposal to reflect the safety that are specified in the field report. I can not emphasize enough just how dangerous this situation is. The system as it exists violates numerous National Electrical Codes, standard practices and common sense.

As I told Tere Haas, we can order equipment with the receipt of a signed contract and begin work with a deposit check.

Please let me know if you have any further questions.

Sincerely,

William Miller
